

MITSUBOSHI BELT MEASURING TOOL

Instructions:

1. Place belt over the upper semi circle
2. Slide down lower semicircle to match belt size
3. Slightly tension the belt
4. Read value on the scale

DESCRIPTION

For measuring the inner length of drive belts such as:

- V-belts
- V-ribbed belts and
- Timing belts

Measuring range: 500 - 2500 mm

Gross weight: 980 g

SCALE

With the help of this measuring tool you are able to measure the inner length of V-belts, V-ribbed belts and Timing belts.

CONVERSION

Depending on which belt profile is used, certain values such as effective length can be read from the conversion Table.

EASY TO USE

lightweight and easy to handle. Lower semicircle slides easily over scale and adapts to belt sizes within measuring range.
